

TRANSPORTATION RESEARCH RECORD

Journal of the Transportation Research Board, No. 2142

Contents

Foreword	ix
<hr/>	
Exploratory Investigation of Nanomaterials to Improve Strength and Permeability of Concrete Celik Ozyildirim and Caroline Zegetosky	1
<hr/>	
Laboratory Assessment of a Self-Healing Cementitious Composite Zhengxian Yang, John Hollar, Xiaodong He, and Xianming Shi	9
<hr/>	
Enhancement of Reactive Powder Concrete via Nanocement Integration Mahir Dham, Todd S. Rushing, Richard Helferich, Tim Marth, Suvankar Sengupta, Rao Revur, Charles A. Weiss, and Toney K. Cummins	18
<hr/>	
Nanocellulose and Microcellulose Fibers for Concrete Sarah J. Peters, Todd S. Rushing, Eric N. Landis, and Toney K. Cummins	25
<hr/>	
Nanotechnology to Manipulate the Aggregate-Cement Paste Bond Effects on Mortar Performance Jessica M. Sanfilippo, Jose F. Muñoz, M. Isabel Tejedor, Marc A. Anderson, and Steven M. Cramer	29
<hr/>	
New Possibilities and Future Pathways of Nanoporous Thin Film Technology to Improve Concrete Performance Jose F. Muñoz, Richard C. Meininger, and Jack Youtcheff	34
<hr/>	
New Calcium Silicate Hydrate Network Luc Nicoleau	42
<hr/>
