

Near-Surface Pavement Failure Under Multiaxial Stress State in Thick Asphalt Pavement Hao Wang and Imad L. Al-Qadi	91
<hr/>	
Analysis of Virginia-Specific Traffic Data for Use with <i>Mechanistic-Empirical Pavement Design Guide</i> Bryan C. Smith and Brian K. Diefenderfer	100
<hr/>	
Longitudinal Joint Data Collection Efforts in Virginia Between 2005 and 2009 Alexander K. Appea and Trenton Clark	108
<hr/>	
Comparison of Moduli of Kansas Superpave Asphalt Mixes Daba S. Gedafa, Mustaque Hossain, Stefan A. Romanoschi, and Andrew J. Gisi	114
<hr/>	
Updating the Pavement Design Catalog for the Washington State Department of Transportation: Using 1993 AASHTO Guide, <i>Mechanistic-Empirical Pavement Design Guide</i>, and Historical Performance Jianhua Li, Jeff S. Uhlmeyer, Joe P. Mahoney, and Stephen T. Muench	124
<hr/>	
Reliability Methods Applicable to Mechanistic-Empirical Pavement Design Method Jennifer Q. Retherford and Mark McDonald	130
<hr/>	
Investigation of Hot-Mix Asphalt Dynamic Modulus by Means of Field-Measured Pavement Response Alireza Bayat and Mark Knight	138
<hr/>	
PART 3—STRENGTH AND DEFORMATION CHARACTERISTICS OF PAVEMENT SECTIONS	
<hr/>	
Effect of Grading on Degradation of Crushed-Rock Railway Ballast and on Permanent Axial Deformation Roar N�alsund	149
<hr/>	
Dynamic Analysis of Thin Asphalt Pavements by Using Cross-Anisotropic Stress-Dependent Properties for Granular Layer Imad L. Al-Qadi, Hao Wang, and Erol Tutumluer	156
<hr/>	
Unbound Aggregate Deformation Behavior due to Traffic Wander: Investigation Using Discrete Element Modeling Phillip R. Donovan, Erol Tutumluer, and Hai Huang	164
<hr/>
