

TRANSPORTATION RESEARCH RECORD

Journal of the Transportation Research Board, No. 2161

Contents

Foreword	vii
<hr/>	
Research and Implementation of Lane-Changing Model Based on Driver Behavior Daniel (Jian) Sun and Lily Elefteriadou	1
<hr/>	
Modeling the Lane-Changing Execution of Multiclass Vehicles Under Heavy Traffic Conditions Sara Moridpour, Majid Sarvi, and Geoff Rose	11
<hr/>	
Incident Management and Traffic Information: Tools and Methods for Simulation-Based Traffic Prediction Wilco Burghout, Haris N. Koutsopoulos, and Ingmar Andreasson	20
<hr/>	
Data Archives of Intelligent Transportation Systems Used to Support Traffic Simulation Patricio Alvarez, Mohammed Hadi, and Chengjun Zhan	29
<hr/>	
Investigating the Shape of the Macroscopic Fundamental Diagram Using Simulation Data Yangbeibei Ji, Winnie Daamen, Serge Hoogendoorn, Sascha Hoogendoorn-Lanser, and Xiaoyu Qian	40
<hr/>	
Ex Post Evaluation of Calibrated Simulation Models of Significantly Different Future Systems Shrisan Iyer, Kaan Ozbay, and Bekir Bartin	49
<hr/>
